Professional Summary

Artificial Intelligence and Data Science undergraduate with experience building full-stack applications and backend APIs using React, Node.js, and FastAPI. Contributes bug fixes and features to open-source projects, with work spanning database integrations, LLM reliability, and developer tools. Interested in backend engineering, distributed systems, and practical AI applications.

Education

PCET's Nutan Maharashtra Institute of Engineering and Technology, Pune Aug 2025 - Jul 2028
B.E. in Artificial Intelligence & Data Science | Savitribai Phule Pune University

Marathwada Mitra Mandal's Polytechnic, Pune Sep 2023 - Jun 2025
Diploma in Computer Engineering | **89.73%**

Technical Skills

Languages: C, C++, Java, Python, JavaScript, TypeScript
Frontend: HTML5, CSS, Tailwind CSS, React.js
Backend & APIs: Node.js, Express.js, FastAPI, REST APIs
Databases: PostgreSQL, MySQL, MongoDB, QdrantDB
Cloud & Development Tools: AWS, Railway, Docker, Git, GitHub
Generative AI: LLM integrations, LangChain, LangGraph, RAG, agentic AI, MCP

Projects

InteraOne [Live] [GitHub]

- Contributed to an open-source, self-hosted customer support platform that brings website, WhatsApp, email, and Telegram conversations into a shared support workflow.
- Worked across gateway, console, AI agent, worker, and embeddable widget services, connecting frontend features with backend APIs.
- Implemented AI-assisted support using LLM integrations, retrieval-augmented generation, and background jobs to answer customer queries from a shared knowledge base.
- Added CRM functionality for contacts, leads, deals, and customer conversations, connecting relationship management with support activity.
- Supported integrations and self-hosted deployment; the project has served **100+ users** and reached **120+ GitHub stars** and **20 forks**.

Open Source Contributions

Apache Superset - Data exploration and visualization [PR #41975]

- Fixed BigQuery project resolution to use the connection URI, preventing dataset-not-found errors when credentials belong to a different project.

Odysseus AI - Self-hosted AI workspace [PR #3840] [PR #5491]

- Prevented blank API integrations through frontend and backend validation. Improved LLM fallback handling so empty or metadata-only responses try the next model.

OpenWiki - CLI for codebase documentation [PR #477]

- Co-authored multilingual documentation support with a language flag and saved language preferences, preserving machine-facing metadata during translation.

Achievements

- Delivered **four merged pull requests** across Apache Superset, Odysseus AI, and OpenWiki, contributing bug fixes and multilingual documentation support.
- Scored **89.73%** in the Diploma in Computer Engineering at Marathwada Mitra Mandal's Polytechnic, Pune.
